Report Type: Site Inspection #001

Decision Date: 11/01/2001

- ☒ 1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:
NFRAP-Site does not qualify for the NPL based on existing information

☐ 2. Further Assessment Needed Under CERCLA.

☐ 3. Remedial study/cleanup needed.

Decision/Rationale:

No waste source was identified on site. The MCL for EDB was exceeded in the domestic well on-site. There were no other exceedances of MCL's in downgradient domestic wells tested. Low levels of VOC were found in downgradient groundwater. These are multiple sources. Only one well had an exceedance of the MCL for EDB. SI was unable to attribute EDB to a specific source or to delineate a groundwater plume. City of Butte supplies drinking water to most of residents in area.
